

The new combined TD/WL Series of high-visibility lighting gives you more affordable, innovative options in the field. The TD/WL Series combines the best of our renowned Traffic Director and Warning Light technologies into remarkable, multitasking single units.

Advanced engineering from 911EP combines both traffic-direction and warning-light patterns into a single bar, with twice the brightness of their predecessors. The TD/WL also features carefully engineered shrouds for more versatility and an encapsulated design to prevent moisture damage. The rear-corded design is available with numerous directional and warning-light patterns.

TD-WL24A	Traffic Director/Warning Light, 24", Amber	\$469.00
TD-WL36A	Traffic Director/Warning Light, 36", Amber	\$490.00

The GALAXY® line uses our signature low-profile design to create complete 360-degree lighting systems with extremely low amperage draw. It's also engineered to provide superior aerodynamics and greater fuel savings than other light bars. The revolutionary modular design of the GALAXY line provides incredible flexibility.

GAL48A2	GALAXY, 48", Amber, Dual Takedown	\$1,780.00
----------------	--	-------------------

The new Orion™ Switch Boxes control functions for all 911EP products. Complying with SAE recommendations, all three switch boxes offer backlit momentary push buttons and LED traffic-direction indicators. The signature low-profile design fits into any console and is easy to install.

ORIEL4	Orion Switch Box, GALAXY Elite™, 4-Button / 3 Position Slide	\$229.89
ORISD4	Orion Switch Box, GALAXY™, 4-Button / 3 Position Slide	\$229.00
ORITD4	Orion Switch Box, TD-WL-LS-LED STAR® - 360 STAR®, 4-Button	\$135.00
